

The Hugh Tracey Kalimbas have **GONE ELECTRIC!**

For nearly half a century, the Hugh Tracey Kalimba has delighted the world with its simplicity, its beauty, and its quality. Still made in Africa from the resonant native kiaat hardwood, the Hugh Tracey is the standard for what a kalimba should be and should sound like.

And now, the Hugh Tracey Kalimba is available with a piezo-electric pickup and quarter-inch jack, installed at the factory in Grahamstown, South Africa. The *electric* kalimba can be plugged in - to a guitar amplifier, a direct box, an effects processor, or a PA. To hear what the Hugh Tracey *Electric* Kalimbas sound like, go to

http://www.kalimbamagic.com/press_releases/electrickalimba_nov06.html

The pickup can be installed in any of the Hugh Tracey Kalimbas, including the Alto, TM Alto, Treble, Celeste Treble, Celeste Pentatonic, Box Pentatonic, and Karimba. For more information on the Hugh Tracey *Electric* Kalimbas, please contact us at (520) 881-4666, or go to <http://www.KalimbaMagic.com> on the web.
